

# CATARACT SURGERY

## NEW FLEXIBLE AND MORE POWERFUL LENSES

Cataracts are most commonly caused by aging of the eyes. Fortunately, they can be easily and effectively removed through a minor surgical procedure. Dr. Michel Pop, a specialist in this field, delivers professional service, without the waiting list.

**Reward yourself with the dramatically improved vision and quality of life that comes with this procedure!**

### A PROCEDURE THAT'S SIMPLER THAN YOU'D THINK

Cataract surgery involves replacing the eye's natural crystalline lens, which over time has lost its transparency, with an artificial intraocular lens. Several types of such lenses are available at our clinic to provide you with the one that's right for you. During the procedure, Dr. Pop makes a tiny incision, removes the crystalline lens and inserts the intraocular lens in its place. Most patients notice their vision is already better one day after surgery. Vision continues to improve until the eye has healed completely, which takes approximately one month.

### SOME IMPORTANT DETAILS

Prior to surgery, Dr. Pop will schedule a preoperative visit. During this exam, drops will be placed in your eyes to dilate your pupils, which will render your vision blurry for four to six hours. On the day of your operation, our nurse will give you a mild oral sedative, followed by either some numbing eye drops or a local anesthetic. No needles are involved. The procedure lasts approximately 20 minutes, after which you will rest for a period of 30 minutes before being able to return home.

### ALL-INCLUSIVE FORMULA

In the 12 months after your surgery, all follow-up visits to our clinics are free of charge. After this time, if you wish to extend this offer of free visits, our Pop Plan is available for the minimal cost of \$80 per year.

### PUT YOUR EYES IN GOOD HANDS

Our procedures are carried out by Dr. Michel Pop, a well-known and innovative ophthalmologist. A certified ophthalmic assistant and licensed nurses complete our medical team. Our clinics are equipped with the latest technologies and most advanced surgical techniques that fully comply with North American sterilization standards. Cliniques Michel Pop is proud to display the Specialized Medical Centre permit issued by the Ministère de la Santé et des Services sociaux du Québec.
