

A BLADE-FREE LASIK

THE GENTLEST CORRECTION FOR MYOPIA, HYPEROPIA AND ASTIGMATISM

You've made up your mind to have your vision corrected with laser eye surgery, which is no small decision. Now you need to make sure you receive the safest and most reliable treatment there is. That is why Cliniques Michel Pop offers the IntraLase® method, a state-of-the-art Lasik technology that enables the procedure to be performed without using blades.

It is a tried and tested method, offering the highest level of safety and precision in laser eye surgery.

It's no wonder that it's the laser treatment of choice among our clients!

FOR IMPROVED COMFORT AND SAFETY WITH LASIK

Thanks to the IntraLase® FS laser, Dr. Pop does not need a blade to create the corneal flap, which constitutes the first step in this procedure.

This laser technology painlessly delivers rapidly microscopic impulses of light, which create a uniform layer of microscopic bubbles under the surface of the cornea.

The laser is guided by a computer, allowing the dimensions of the layer of bubbles to be made with extreme precision. Dr. Pop then detaches the corneal flap along the perforations created by the bubbles and proceeds with the Lasik correction procedure.

A TREATMENT THAT MINIMIZES RISKS AND COMPLICATIONS

If you're looking for a laser eye correction that offers excellent results, while minimizing the risks and complications associated with using a blade, the IntraLase® method is for you. Over one million surgeries have been safely and successfully performed with the help of this technology.

FLEXIBLE PAYMENT OPTIONS, FREE TOUCH-UPS

Because we have an agreement with a financial institution, you have the opportunity to spread the cost of your surgery over 48 to 60 months, with interest. With Accord D financing from Desjardins, the request is quick and easy. We offer a guarantee on the cost of your laser treatment and our Pop Plan for your peace of mind.

PUT YOUR EYES IN GOOD HANDS

Our procedures are carried out by Dr. Michel Pop, a well-known and innovative ophthalmologist. A certified ophthalmic assistant and licensed nurses complete our medical team. Our clinics are equipped with the latest technologies and most advanced surgical techniques that fully comply with North American sterilization standards.

Cliniques Michel Pop is proud to display the Specialized Medical Centre permit issued by the Ministère de la Santé et des Services sociaux du Québec.
